▲ NEW WAVE BENCH

Designer: Eric Chan
Materials: Laminated and molded maple seat and legs.

The Wave Bench answers a renewed desire for harmony, beauty and simplicity, three principles that govern the artful work of designer Eric Chan. With the exquisitely made Wave Bench, he translates one of nature's most dynamic forms into a functional piece of furniture whose gentle undulations serve as a user-friendly seat. It offers a handsome solution for public seating in a gallery or retail space, as well as embodying a warmth suitable for residential applications. Educated at Cranbrook Academy, Chan is a designer of extraordinary talent who has won eight IDEA awards and ten *ID Magazine* Design Review Awards. His Wave Bench is now available exclusively through Design Within Reach.

◀ KIVA MESH SCREEN

Dimensions: 63" H 73" W 5" D

Designer: Eric Chan for Herman Miller®

Materials: Patented fiberglass and polyester weave

In a simple, beautiful manner, the Kiva Mesh Screen solves the common problem of personal privacy in an open plan workplace. Designer Eric Chan creates a user-friendly all-fabric screen that is sturdy, yet light in weight so that you can create visual privacy almost anywhere—and easily re-position the screen as needs change. One side of the screen is straight; the other has undulating curves, a design consideration that creates both a sensual aesthetic and a functional advantage—the screen will stand upright in a straight line, taking up less space than conventional screens which must be angled. The ultra-durable fabric has a soft silvery finish that's good looking enough for commercial or residential settings.
